

SUPPLY CHAIN MANAGEMENT UNIT
PROCUREMENT SPECIFICATIONS FORM (R 30 000 – R 200 000)

SPECIFICATIONS:

Proposal for production and erection of Street Poles
Adverts for Sedibeng District Municipality

DESCRIPTION

**Proposal for production and erection of Streetpole adverts in the following strategic areas:
Lesedi (30 units), Emfuleni (50 units) and Midvaal (20 units).**

A service provider is required to make proposals for the manufacture of a T-shaped bracket from which flags and printed signs can be hung. The T-shaped bracket allows for signage to be mounted on either side of the street pole. This bracket will be mounted on the top of existing light poles in the areas identified. The bracket will remain on the light poles after the World Cup and be used for other adverts (requires a sturdy design with easily changeable prints).

The design of the signs need not be quoted for as they will be supplied by the SDM once the sizes of the panels are supplied by the manufacturer.
