

SPECIFICATION: 8/2/8/1-2011

SECURITY INSTALLATION - CONSTRUCTION

PHASE 1

Services are required for the installation of security measures specific to construction only. The successful service provider is to:

- Do a complete assessment of the property.
- In consultation with the Municipality, agree on the construction required to secure the property.
- Draw all plans required, and approval from the relevant municipality for the necessary construction.
- Complete all construction within the stipulated timeframes of six weeks
- Clear all rubble and handover the property in acceptable condition.

For assessment purposes tenderers should quote on the following:

- Cost per running meter of extending the height of a double brick perimeter wall by an additional 50cm. This must include plastering.
- Cost of painting per square meter of a perimeter wall on both sides.
- Cost per running meter of Construction of additional security walls of double brick width, plastered and painted, at a height of 2m.
